

Minifigs Dungeons & Dragons Miniatures

www.DnDLead.com

Most Minifigs are easily identifiable by their base stampings. Occasionally a figure will lack a base stamping, especially the demons. Bases are very simple, rectangular and in most, though not in all cases, it is the top of the base that is stamped. There are several slight variations of many models. This is partially due to a few differences in the miniatures exported to the US. The produced figures with their base numbers are below.
